

ROBS ARM CHEST AT FT. DOUGLAS

Many Revolvers Taken
By Thief.

Cartridges and Pouches Also
Included in List of Mis-
sing Articles.

A N ARM chest containing twenty-six Colt's U. S. army revolvers, caliber .38, valued at \$300, about the same number of cartridge pouches, and several hundred rounds of ammunition, belonging to the band, Twenty-ninth infantry, was taken from the quarters of the band at Fort Douglas late Wednesday night, discovery of which was not made until yesterday morning.

Recruit James Stone, enlisted on the 10th inst., now languishes in the post guardhouse on suspicion of having been implicated in the deed. The robbery was not discovered until Drum Major George E. Cleveland went into the armory about 8 a. m. yesterday, for the purpose of placing a revolver, recently turned over to him, in the chest, in which are kept the revolvers.

Discovers Robbery.
Failing to find the chest in its usual place, he went into the room adjoining, only to find the window raised, under which, upon the ground, was the missing chest. He immediately reported the matter to the police headquarters, where he learned that twelve revolvers had been found by a patrolman early yesterday morning near the Salt Lake breeding company. The revolvers were those belonging to the band, Twenty-ninth infantry. With the revolvers were found several letters addressed to James Stone, the recruit now in confinement, and it was upon this evidence that the man was arrested.

Recruit Stone's Denial.
Stone was present at the 11 p. m. inspection of the band on Wednesday. He belongs to company D of the Twenty-ninth, and has been, since enlisting, on special duty with the band, learning music.

He was on the rifle range at practice when placed under arrest by Drum Major Cleveland, and taken to the guardhouse to await an investigation. He seemed surprised when informed of the theft and claims to know nothing of it.

Captain John T. Madden, adjutant of the Twenty-ninth, is the responsible officer for the missing revolvers. Seven of them are still missing, of which no trace can be found.

The lock on the chest was pried off and the culprit spared the Government the loss of seven pistols, which he left in the box.

A suit case belonging to Stone was also found last night to be missing from the storeroom. It is supposed that the letters found with the revolvers were in this case, in which the pistols were carried to the brewery, and it may develop that another may be guilty of the deed.

Evidence, however, points to Stone as the guilty one, and he will be held at the guardhouse until a thorough investigation is made.

Kent Moore, the soldier who left a few days ago, taking with him a revolver, is also being sought for, and it is thought this man may have been an accomplice to the robbery.

Jericho Club Initiates.
Twenty members were initiated into the ranks of the "Jericho Club" at Fort Douglas last night, all of whom are soldiers of the Twenty-ninth infantry. The monthly dance to be given by the organization will be held June 23, when a large number of invited guests will be present, and the new members will be given an opportunity to learn the workings of this social organization.

NOVEL TRAMWAY FOR SALT LAKE BEACH NOW

Contract Awarded for Construction
of Unusual Railway
Project.

M. A. PATTEN and O. H. Skidmore have been awarded the contract for constructing a novel tramway at Salt Lake beach to be used for carrying bathers to deep water, as well as those who are not bathing who may care for the ride by rail over the waves and the view to be obtained by means of the unusual journey. The railroad to be put into operation is an invention of Mr. Patten, which is in successful use for carrying logs and other freight in some of the lumber regions of Montana. It is constructed to an extent upon the single rail plan, with bifurcated cars. But this road, while built upon a single set of pilings, has two rails twelve inches apart. The bottoms of the cars extend below the level of the rails on either side, and the cars are balanced by their own weight. Passengers will be seated facing outward on either side. The motive power will be a gasoline engine. Important features of the new style of railroad are the cheapness of construction and the ease of operation.

The tramway at the beach will be extended for the present a distance of about three-quarters of a mile into the lake from the pavilion, but if it proves as popular as a traction as is anticipated it should, a loop will be formed to make a more extended ride and to add to the convenience of running more than one car.

NEW POSTOFFICE
STATION PROMISED

Postmaster Arthur L. Thomas has received from the Postmaster-General the formal order to establish on July 1 "station A of the postoffice at Salt Lake City." This station is to occupy the new building being erected for it at Second South and Eighth East streets by Charles Crane. An extra clerk has been appointed for the station, and one clerk will also be transferred from the main office, as well as nine carriers. This is the fifth full station of the Salt Lake City office—stations authorized to receive and dispatch mails, transact registry and money order business and sell postoffice supplies—the others being Murray, Calder's Park, Sugar House and Fort Douglas. There are fifteen sub-stations, which are numbered from 1 to 15, inclusive.

Remodeling Bank Building.
Work of remodeling the Bank of the Republic building, Main and Second South streets, will be begun today under the supervision of Architects Ware and Treganza. The part of the work first undertaken will be that of rebuilding the second story, occupied by the White House hotel, which will include the removing of the hotel entrance from Main street to the Second South street side of the building.

Following this change, the room now occupied by the bank and the Chicago & Northwestern railway offices will be thrown into one room and fitted up into what will be among the finest banking quarters in the West.

Day's Bank Clearances.
Yesterday's bank clearances amounted to \$491,745.14, as compared to \$576,705.61 for the corresponding day of last year.

Experts Alkali Lands.
C. G. Elliott, an expert in drainage connected with the experimental work of the United States Department of Agriculture, was in the city yesterday from Washington. Accompanied by Prof. W. W. McLaughlin, irrigation engineer of the State Agricultural college, Mr. Elliott left last evening for St. George, Utah, to investigate the alkali lands of that region for the purpose of gathering data for use in connection with the Government's experiments in drenching lands of the alkali deposits.

Bingham Canyon School.
Bingham canyon is about to build a new school building to cost about \$20,000. It is to be a modern structure containing eight class rooms. The plans are being prepared by Architects J. A. Headlund & Co. of this city, and bids for the work of construction will be advertised for at once.

Picking Up a Horse Shoe
May bring you good luck, but one of our Sennit straw hats will make you lots more cheerful during the summer-time.

A Vile Disease

Contagious Blood Poison has wrecked more lives and caused more misery and suffering than all other diseases combined. Some are inclined to treat it lightly, but these soon learn that they have to deal with a powerful poison that is slowly but surely breaking down the constitution. Contagious Blood Poison not only mutes out punishment to the one who contracts it, but others may become innocent victims of this vile disease through inheritance.

For years I was troubled with the most malignant type of chronic blood trouble. After trying various other remedies without getting any benefit, I was induced by a friend who was cured of a constitutional blood trouble, to take S. S. S. A few bottles cured me permanently. I also consider S. S. S. the best tonic ever made. While taking it my weight increased and my health improved in every way. S. A. WHITTON, 2503 Perryville Ave., Allegheny City, Pa.

SSS
mercury and potash treatment all signs of infection may disappear, but leave off these minerals and you soon find out the poison is still alive and you are just as bad off as ever. S. S. S. is the only antidote for Contagious Blood Poison. It destroys the virus completely without injuring the system. It is a vegetable remedy, and we offer \$1,000 for proof that it contains a single mineral ingredient. S. S. S. not only works the poison out of the blood thoroughly, but restores vigor and strength to all parts of the system.

Write for our special book on Contagious Blood Poison, describing the different stages and symptoms and containing much other interesting information about this most despicable of all diseases.

How to Judge Beer
POINTS OF EXCELLENCE

"BRILLIANCY"—Clarity and polish, proving perfect brewing and fermentation.
"CLEAN TASTE"—The absence of a disagreeable foreign or "off-taste," proving scrupulous cleanliness during the brewing process.
"SOLID, CREAMY FOAM"—An infallible indication of body, age and excellence of brewing material.
"PURITY"—Impossible to find in most bottled beers, because their preservation is gained through chemical adulteration.
"FLAVOR"—The distinctive individual characteristic of any beverage, as peculiar to it alone as its odor to the rose. A delicious and pronounced hop aroma is the highest standard.

A. B. C.
Is the ONLY beer that possesses all of these essential qualifications. Its purity is absolutely guaranteed by its makers. It is the ONLY beer that can be so guaranteed, because it is the ONLY beer bottled exclusively at the brewery.
